## THE COMMERCIAL OPPORTUNITY

# Reach Firm Leaders While They Are Making CAS Decisions

From Scorekeeper to Strategist gives sponsors direct access to firm owners, partners and CAS leaders actively reviewing how they structure, deliver and scale advisory services — not a broad awareness audience of passive content consumers. Participants are choosing a practice model, a service mix and delivery partners in real time, putting sponsor visibility in front of buyers at the moment those decisions are made.

### What participants are deciding

- The CAS practice they want to build
- The services they should offer, and the clients they are best positioned to serve
- How those services should be delivered
- The people and operating model required
- The systems, technology and processes required to scale
